To Whom it may concern,

I am currently in my third year of Econometrics and Business at the University of Illinois at Urbana-Champaign. I want to know what factors cause businesses to succeed in a foreign market. I know financial and managerial accounting principles, asset pricing models, organizational behavior models, and how people's choices are impacted by factors like interest rate, wages, and technological progress. I worked with data sets using R studio, ran websites using Github Pages, and recorded financial statements for small businesses. I hope to work with team mates to solve problems for businesses.

My favorite subjects to study are math, computer science, economics, and business administration. I like math because it challenges me to think about things abstractly, programming because it has potential to make things easier for everyone, economics because of how practical it is in everyday life, and business administration because I want to learn about teamwork. I enjoy learning about life in other countries and how global events like trade, economic policy, and pandemics affect people.

I hope to bring my skills and passion to work. I am hopeful because this will be my first internship experience. I can be reached at (949)-690-5181 or johnguoaa@gmail.com. Thank you for your time and I hope to hear from you soon.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jon Guo', with a stylized, cursive script.
